Improve Delivery Quality

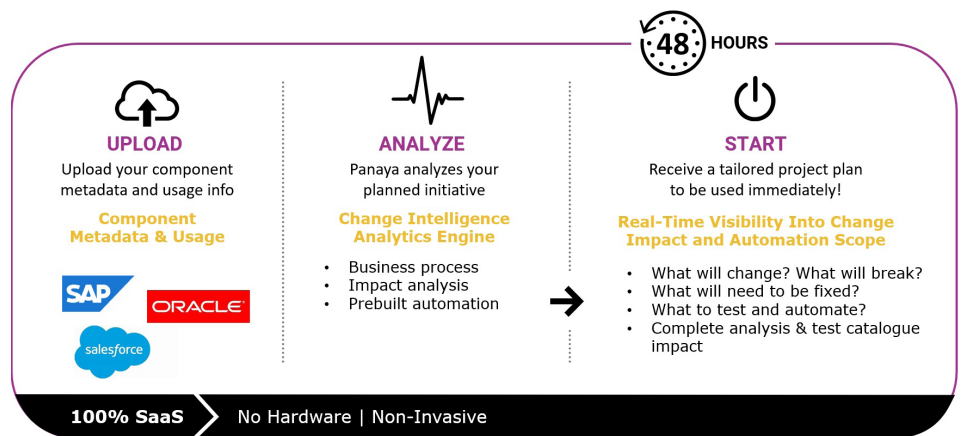

Test Automation + Change Intelligence

Accelerate SAP Change with Confidence

Together, Worksoft and Panaya facilitate faster business transformation by providing better visibility, discovery and testing of your business processes to proactively manage and accelerate SAP change projects.

The combined, seamless solution delivers comprehensive change impact analysis, plus intelligent code remediation resulting in cutting-edge automation scoping to effectively manage change for ECC projects, S/4HANA system conversions and S/4HANA greenfield implementations.

Worksoft's Connective Automation Platform and Panaya's IA Release Dynamix come together to deliver the safest and most cost-effective way to maximize ROI on your current SAP systems, or prepare for the next steps in your ERP evolution.

RECEIVE COMPREHENSIVE IMPACT ANALYSIS IN JUST 48 HOURS

In just 48 hours, Panaya's change intelligence capability creates a virtualization of your entire system and determines how each unique aspect of the environment will be affected by planned upgrades and innovation projects.

Simply upload component and usage metadata to the Panaya environment and the sophisticated AI-based analysis identifies everything that will change and break as a result of an upgrade or project. It then generates a prioritized list of correction tasks and tests, enabling you to focus your efforts and eliminate go-live errors.

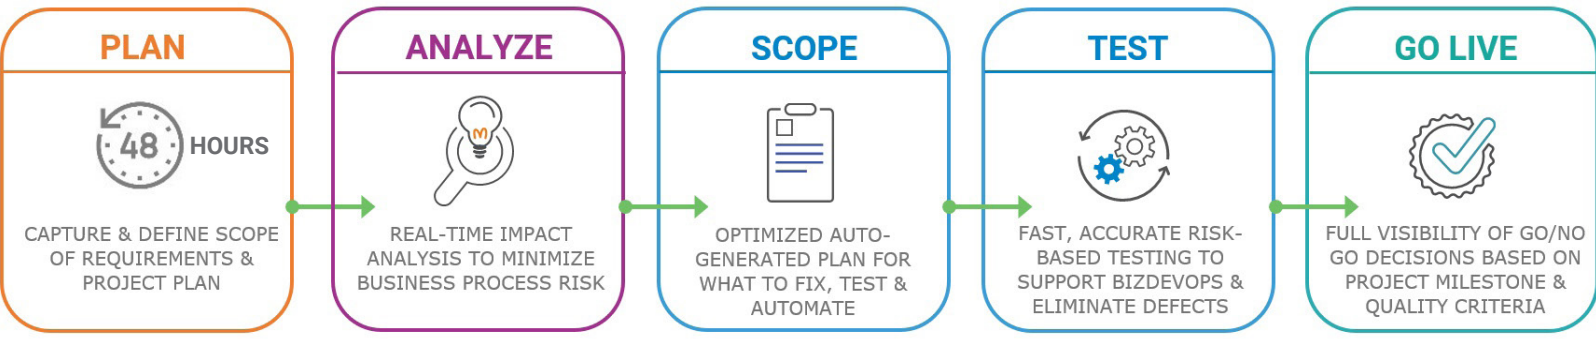

Intelligence code remediation is also applied to automate code corrections, which saves hundreds, even thousands of man hours in complex projects.

Experience Zero Risk for SAP innovations with Worksoft + Panaya

Futureproof against the impact of change on your business processes with an unmatched joint solution to plan, scope, optimize, and test with confidence.

Futureproof Against the Impact of Change

Change is pervasive and persistent in today's enterprise IT environments. How can you ensure change won't negatively impact the business processes your organization depends on?

Experience unprecended visibility into the impact of change and identify opportunities to optimize the scope and execution of your end-to-end business process testing. With Worksoft and Panaya, you can:

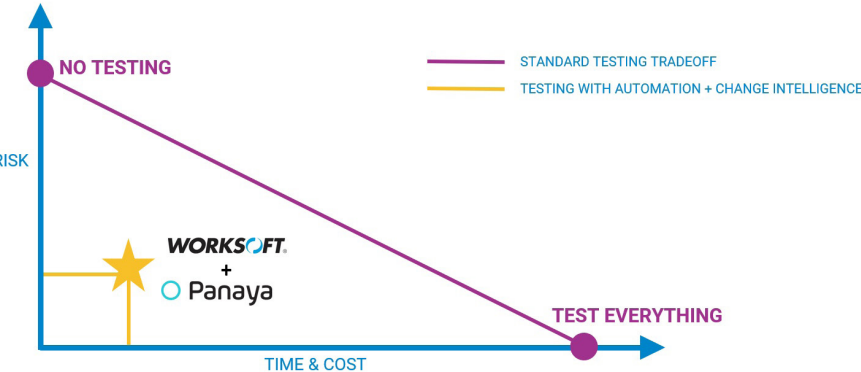

- Seamlessly Run Manual & Automated Tests
- Understand Exactly What to Test
- Gain Proactive Visibility of Remediation Risks
- Improve Delivery Outcomes
- Accelerate Time to Market

CENTRALIZE CHANGE MANAGEMENT | SEAMLESSLY INTEGRATED SOLUTION

Synchronize Your Worksoft Library Into Panaya. Consolidate all testing assets into Panaya to plan cycles, and manage data sets, all seamlessly integrated into a single user experience.

Access Detailed Test Results with Ease. Get highest-quality test result documentation from a single place, covering attended and automated test cycles.

Gain Full Control & Visibility Over Testing Progress. Work seamlessly inside Panaya. Execute and monitor tests while easily resolving bottlenecks.

Test the right things with Worksoft and Panaya to accelerate change projects, while reducing risk.

1 SAP PARTNER EXPERTISE

Apply the combined expertise of two leading SAP partners with unparalleled expertise to provide a seamless solution to support SAP migrations, upgrades and customizations.

2 REAL-TIME CONTROL

Drill down into each step of your change with a holistic approach for test management and execution using one collaborative SaaS platform.

3 FASTER CHANGE DELIVERY

Automate your entire process to cut weeks down to days by injecting real-time automation into your SAP change process.

Combine industry-leading Test Automation with best-in-class Change Intelligence for risk-free SAP migrations and optimizations.
