

Ensure Every Business Process Works!

Worksoft automation helps enterprises understand every core business process, and ensure it works flawlessly even when enterprise apps change.

Bullet-proof business process quality. Faster innovation. Shorter project timelines. Lower technology risk. With the numbers to back it up, it's time to automate with Worksoft.

THE INDUSTRY'S ONLY PLATFORM FOR AUTOMATED BUSINESS PROCESS TESTING & DISCOVERY

Ensuring the success of digital business. Today, every business is a digital business. End-to-end processes can span dozens of enterprise apps and digital platforms, and companies need to ensure that each one performs as designed. A disruption to business continuity is unacceptable – so every platform needs to work flawlessly. That's where Worksoft automation comes in.

Test everything, every day. Today, manual labor is being replaced with digital labor – and Worksoft offers an essential automation path. Worksoft automates business process discovery and validation to ensure companies are ready for business even in the face of unprecedented change. Worksoft functional test automation lets you check every process and app for every project and across your enterprise, as often as you like. Even every day. That's industry-unique.

- » **Industrial-Scale Automation.** Check 500,000+ business process steps across virtual machines in a matter of hours. Monthly, weekly, daily, or on-demand.
- » **Cover Everything.** Lock-in quality across all platforms, including customer-facing websites, mobile, cloud, big data, packaged & custom enterprise apps.
- » **Business Process Centric.** Foster collaboration between business users and IT with Worksoft's intuitive platform. It's easy to use, no programming or scripting required.
- » **Fast Results.** Achieve astounding results in 90 days or less. 40% faster projects. Huge labor savings. Accurate process documentation. And no more software glitches.

REDUCE TECHNOLOGY RISK

90%+

automation of core business process testing for high quality

IMPROVE EFFICIENCY

50,000+

hours saved annually, and millions in cost savings with automation software

TOP RANKED FOR TEST AUTOMATION

A new Gartner report ranks Worksoft No. 1 in the Packaged Applications Use Case for Software Test Automation. The industry report "Critical Capabilities for Software Test Automation" provides an in-depth technical review of software test automation capabilities of 12 automation solution providers in three categories: Packaged Applications, Responsive Design and Mobile Applications. Worksoft is the only vendor ranked in the top three of every use case.

"We feel the new Gartner report reinforces our view that Worksoft's end-to-end approach is market-leading and unique. We believe that no other platform matches Worksoft's capabilities," said Jim Kent, CEO, Worksoft. "A key differentiator is Worksoft Analyze®, which speeds up test building and allows companies to efficiently build and maintain an enormous enterprise-level portfolio of business process tests."

WORKSOFT SUPPORTS EVERY ENTERPRISE APPLICATION

Worksoft's software is easy to use and provides the industry's highest levels of automation – often exceeding 90% coverage of a company's critical business processes. Leading global enterprises and more than 300 companies worldwide have embraced Worksoft's automation technology to ensure quality execution, minimize technology risk, and deeply understand their real business processes.
